

Anglia Ruskin University have been developing the Chelmsford Campus and have constructed a number of new buildings over the last three years.

The objective of the Campus environs project is to create an integrated landscape between the new buildings. This has included both pedestrian, cycle and vehicular access across the campus, it includes parking areas recreational space and landscape features.

This will create a coherent environment that takes into account the needs of the students and the requirements of a modern university campus and enhances the environment of an attractive riverside site.

The original landscape plan was created by Gillespies following a Masterplan for the site created by Wilkinson Eyre.

The works have been carried out in three phases following the completion of the buildings.

G Dolden & Associates have carried out the project management of the project. The project has largely been completed however the soft landscaping may be enhanced as further funds become available.

Project Cost:	£1,400,000
Carried out in phases from	2006
Completion Date:	January 2009

Phase 1, The North Car Park by Mildmay Building
